WORK EXPERIENCE

Junior Software Engineer

Servco Pacific Inc.

February 2022 - June 2024

- Maintained front-end retail and distribution websites using Javascript and HTML/CSS, pulling data from Salesforce Commerce Cloud
- Developed custom user friendly components in Salesforce Commerce Cloud's Page Designer for non-technical employees to build pages without developer intervention
- Contributed to the development of a Google Chrome extension, displaying customer information to customer-facing employees from an Amperity database
- Contributed to the development of a Servco Buying Center Payment Portal to allow customer-facing employees to approve and print on-demand checks using Next.js, PostgreSQL, and SharePoint's REST API

PROJECTS

Johnsonslist

Craigslist style web application for UH students

- Built the user interface using Javascript, Semantic-ui, and React
- Implemented the database and stored listings using MongoDB

Pizza Time

VR Spiderman web swinging pizza delivery game

- Built using Unity and C# to design swinging physics and game interface
- Animated character hand gestures in Blender
